SKILLS

JavaScript, React, Redux, HTML, CSS, Ruby, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, PostgreSQL, Webpack

PROJECTS

NICFLIX (Ruby on Rails, React, Redux, JavaScript, HTML5, CSS3, PostgreSQL, Webpack)   live | github
A fully-featured, Nicolas Cage themed, near-identical clone of the Netflix web app
- Utilized a combination of Javascript for DOM manipulation and video play and pause, as well as CSS for hover effects and styling.
- Incorporated Active Storage withAWS S3 services to store image and video references in a PostgreSQL database.
- Built a versatile search component that handles user search, genres, and a CRUD list feature, delivering instant search results to the user by utilizing a wildcard frontend route that could either be a search term, genre, or a keyword for favorites.

SIX DEGREES OF KEVIN DURANT (JavaScript, HTML5, CSS3)   live | github
An implementation of six degrees of separation for mutual NBA teammates.
- Deployed a breadth-first search algorithm to map the shortest path from any NBA player in history to any other player through a chain of mutual teammates.
- Received 6000 upvotes on Reddit, posted on Twitter by ESPN Sportswriters and retweeted by other sports personalities, getting 50,000 hits in 24 hours upon posting.

WTRCOOLR (React, Express, Node.js, MongoDB, CSS3)   live | github
An initiative to bring water cooler encounters online through video conferencing.
- Utilized React to create a one-page app with several different components with their individual functions, including video conferencing, adding and removing time schedules to an organization, as well as a calendar for upcoming meeting times.
- Deployed a NoSQL database to house information on both users and organizations, hosted on MongoDB.
- Built pairing algorithms to randomly match two users to allow them to video chat with each other when their organization's designated coolr time comes.

EXPERIENCE

Project Manager
Isirey Builders   July 2014 - Dec 2020
- Headed 15 residential housing construction projects totalling 2.4M USD in value, generating 700,000 USD in company profits.
- Managed 100+ employees; routinely planned and managed daily operations to include scheduling labor, managing inventory, and ordering supplies for current and future jobs.

Data Analyst
Citibank   March 2011 - December 2012
- Collaborated with international teams to collect, process, check, and store company-wide spend data.
- Built Excel macros and wrote VBA scripts to automate data quality checks, reducing analysis time by 90%.
- Leveraged custom SQL queries to create specialized data reports for various departments.

EDUCATION

Web Development - App Academy   January 2021 - May 2021
Immersive software development course with a focus on full-stack web development, which entailed 1000+ hours of coding.
MBA - University of the Philippines   January 2013 - March 2014
BS Management Information Systems - Ateneo de Manila University, Philippines   June 2007 - March 2011
